

Safety and Health Policy

We pursue creation of safe and comfortable working environment and happiness by preemptively establishing and fully implementing Safety and Health Management System.

1. Pursuing the safety and health of employees, visitors and communities as a top priority and abiding by all the regulations and requirements related to the Safety and Health of our employees.
2. Positive participation in Safety and Health Activities of all employees, contractors and spreading & internalizing Safety Culture through active communication.
3. Assessing and improving of harmful and hazardous factors that may occur in every process, such as production, R&D, logistics and construction.
4. Achieving of our safety goals through clearly recognizing the responsibilities & roles, ensuring the competence and positive participation in safety and health management.
5. Employees' understanding and compliance through setting up the procedures in every process (production, R&D, logistics and construction, etc.) and defining the behavioral & safety standards in workplace.
6. Properly implementing Safety and Health Management Policies of All employees and opening it to all stakeholders through our homepage, manuals, and handbooks.
